Boiler Inspection Services

Jamko Technical Solutions utilizing an assortment of remote visual inspection products provides a full array of boiler component inspections. Specific inspections include:

- Headers
- Drums
- Economizers
- Soot blowers
- Superheaters
- Stack/refractory
- Downcomers
- Tubes
- Desuperheaters
- Burner assemblies
- Dry pipe/box
- Fuel handling lines

Scale build-up and ligament/spider cracking as well as other discontinuities are easily documented with remote visual inspection tooling and Jamko's experienced staff. Loose part retrievals such as vortex eliminators, baffle plates, strainer baskets, desuperheater spray liners/nozzles in addition to various other foreign objects can be removed in a quick and cost effective manor utilizing Jamko's loose part retrieval experts.

- **Loose part retrieval**
