

STEAM GENERATOR SECONDARY SIDE INSPECTION SERVICES

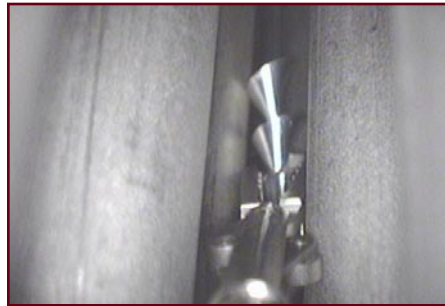

Jamko Technical Solutions, Inc. (JTS) offers years of proven field experiences in the areas of Steam Generator maintenance, inspection, and cleaning services. JTS also offers a wide range of custom engineered tooling to perform remote visual inspections and foreign object search and retrieval (FOSAR).

RVI & FOSAR SERVICES

At JTS, our main focus has been to provide experienced professionals with a seasoned approach toward delivering quality remote visual inspections for steam generators. Our engineering staff has designed and manufactured specialized inspection and retrieval tooling for steam generators of all makes and models. Years of experience, proven technology, dedicated field professionals and an engineering staff provide the necessary tooling and resources to retrieve foreign objects from any location of the steam generator.

GORD Inspection Crawler

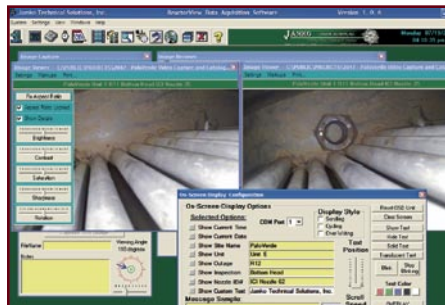

Loose Part Retrieval

ENGINEERING SERVICES

Our staff designs and develops custom solutions for tooling, mock-ups, and software to tackle the toughest problems. Jamko has a multitude of mock-ups of various plant components including full scale triangular and square pitch steam generator mock-ups to help in designing, training and qualification of our tools. JTS has also developed custom software designed specifically for the video capture and documentation of images taken during any inspection.

Steam Generator Mock-up

DataView Software

The following is a summary of the Steam Generator Secondary Side Inspection Services performed by our staff.

Steam Drum

- Primary Separators
- Swirl Vanes
- Top of Bundle
- Anti-Vibration Bars (AVB's)
- Feed Ring / J-Nozzles / Backing Rings
- Decks / Hatches / Ladders
- Chevrons / Demister banks
- Transition Welds

Top Support Plate

- U-Bend Region
- Flow Holes / Quatrefoils
- In-Bundle
- Top Support Plate Retaining Nut
- Support Plate Wedges

Flow Distribution Baffle

- Foreign Object Search And Retrieval
- No-Tube Lane
- In-Bundle

Tubesheet

- Foreign Object Search And Retrieval
- Tube lane Blocking Device
- No-Tube Lane
- Annulus Region
- In-Bundle
- Stay Rods
- Wrapper to Shell Supports
